

# Fungal Spore Origami

## Alter-not-a-one

*Alternaria alternata* origami spore

Created by Jun Tsuji

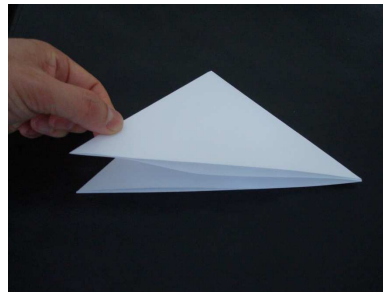

### Step 1.

Fold, crease, and cut-off the extra paper to make a triangle.

### Step 2.

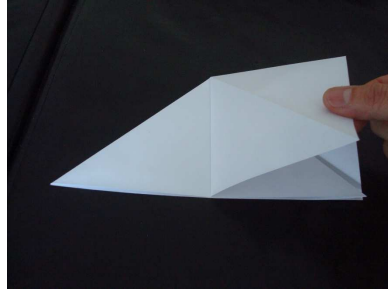

Bring the two 45° corners together and crease to make a smaller triangle.

# Fungal Spore Origami

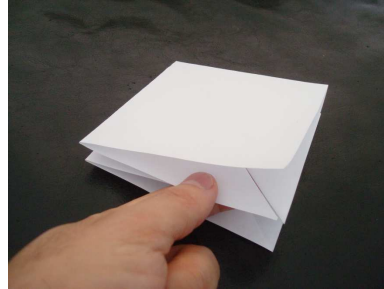

## Step 3.

Open the top triangle, move the left corner to the right corner, & flatten to make a square. Flip the paper over.

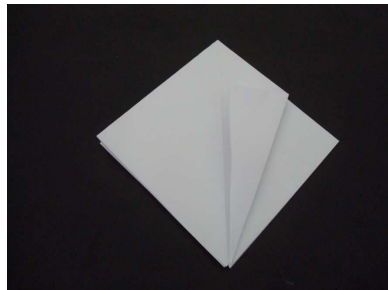

## Step 4.

Open the triangle, move the right corner to the left corner, & flatten to make another square.

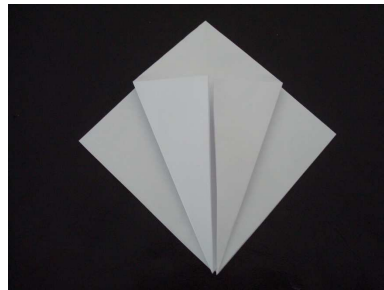

## Step 5.

With the open end of the square oriented downwards, fold the right side to the center and crease.

## Step 6.

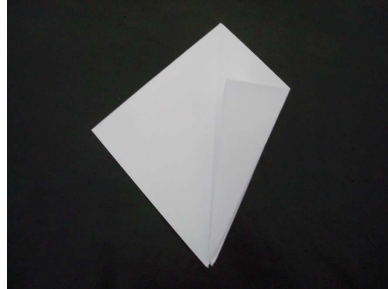

Fold the left side to the center and crease. Flip the paper over.

## Step 7.

Fold the right side to the center and crease.

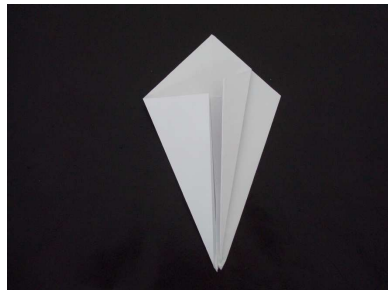

## Step 8.

Fold the left side to the center and crease.

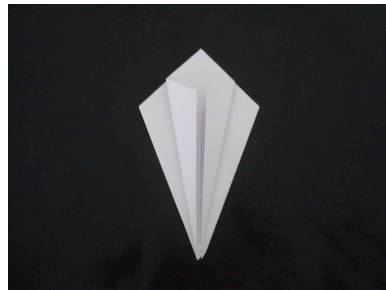

## Step 9.

Fold the right side to the center and crease.

## Step 10.

Fold the left side to the center and crease. Flip the paper over.

# Fungal Spore Origami

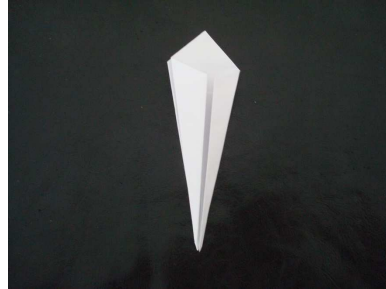

## Step 11.

Fold the right side to the center and crease.

## Step 12.

Fold the left side to the center and crease.

## Step 13.

Insert fingers between side folds. Blow air through the hole at the pointed end to inflate.

## Step 14 (optional).

Add lines for the septa.
